## **3DQuickPress Certified as SolidWorks Gold Product**

Highest Level of single-window integration to enable top productivity to tool designers

**Hong Kong, August 22, 2006** - 3D QuickTools Limited today announced the successful SolidWorks Gold Product Certification of 3DQuickPress, the mostly-used 3D stamping design solution in the market.

In the last two years of international distribution of 3DQuickPress, over 300 users have successfully migrated to 3D tool design. They get the full benefits of re-using 3D product design data in the tool development cycles. 3DQuickPress users are joining to the premier group of product designers and mechanical engineers who have been using 3D to make better design.

The Gold Product Certification is based on SolidWorks 2007 and 3DQuickPress version 3. Both are the latest editions of their flagship products. It symbolizes the richness of the product functionalities and fulfillment to the end-users' expectation to 3D.

"We are amazed on the high degree of integration with SolidWorks which 3DQuickPress managed to achieve. The extension of SolidWorks application towards the metal manufacturing design market represents a new market for the growth of SolidWorks and 3DQuickPress," said Chris Salmers, SolidWorks Partners Manager.

"We have been using 3DQuickPress for almost two years. Our engineers have been enjoying the ease of use in SolidWorks and the accelerating power of 3D tool design 3DQuickPress brings to SolidWorks. These two complimentary factors enable our company to handle more complex and challenging tooling which used to be out of our scope. The seamless integration of 3DQuickPress in SolidWorks makes our complete and tedious stamping die design process all in a single environment which is not easy to achieve. The 3DQuickPress SolidWorks Gold Product status is the most encouraging news to the tool designers in the world." said C.N. Tsang, General Manager, Chiaphua Component Ltd.

## **About 3D QuickTools Limited**

3D QuickTools Limited is the developer of 3DQuickPress, 3DQuickStrip, 3DQuickForm, 3DQuickQuote and 3DQuickMold. These applications provide the most advanced and comprehensive 3D progressive die design solution in the SolidWorks environment. The company has been providing high quality progressive die design solutions since 1994. All products are supported by leading industrial support partners in all major countries. For further information, visit [www.3dquickpress.com](http://www.3dquickpress.com) or send email to [info@3dquickpress.com](mailto:info@3dquickpress.com).

## **About SolidWorks Corporation**

SolidWorks Corporation, a Dassault Systèmes S.A. (Nasdaq: DASTY, Euronext Paris: #13065, DSY.PA) company, develops and markets software for mechanical design, analysis, and product data management. It is the #1 supplier of 3D mechanical design software for the mainstream market. SolidWorks® is the mainstream 3D CAD market's leader in number of users in production, customer satisfaction, and revenue. For the latest news, information, or a live online demonstration, visit the company's Web site ([www.solidworks.com](http://www.solidworks.com)) or call 1-800-693-9000 (outside of North America, call +1-978-371-5000).
